

## REMARKS

Claims 1-11, 16, and 17 were rejected under 35 U.S.C. 102(b) as being anticipated by Yahr (U.S. Patent No. 4,820,290). Further, claims 1, 10, and 12-17 were rejected under 35 U.S.C. 102(a) as being anticipated by Velaquez (U.S. Patent No. 6,699,226).

In response, Applicant has amended the claims to focus on a main body with only one open end; a seminal reservoir that is unitary with said main body, and a securing means with adhesive configured to attach via said adhesive to the user's skin. Applicant has added no new matter, as such was already shown and/or described in the text and figures of the original filing. Respectfully, neither Yahr nor Velaquez present a device with the limitations that are now in the claims.

Any extensions of time are hereby requested. ***Please charge all fees due and owing to Deposit Account No. 500356 in the name of A + Legal Services - Greenberg & Lieberman.***

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Michael L. Greenberg', with a stylized, elongated flourish extending from the end.

Michael L. Greenberg, Esq.

Registration Number 47,312

CERTIFIED MAIL

I hereby certify that this amendment and response was submitted electronically to the Commissioner of Patents at the United States Patent and Trademark Office on February 26, 2007.

Respectfully submitted,

A handwritten signature in black ink, consisting of two distinct, stylized marks. The first mark is a small, looped flourish. The second mark is a longer, more complex stroke that starts with a small loop and ends with a long, sweeping tail that curves downwards and to the right.

Michael L. Greenberg, Esq.

Registration Number 47,312
